FROM THE DESK OF PROJECT COORDINATOR

We take you to the world of people who had very little accesses to development activities meant for them, when we started organizing them for a better and meaningful way of life! Gradually, we formed GSPECs, SHGs, YGs and organized them as village institutions responsible to the work to be done during all these years. Acting with the spirit of MENTORING at grassroots, we shared our objectives and organized dialogues with communities to ensure their overwhelming participation to realize their dreams of prosperity in remote and hard to reach villages targeted under the JTELP project.

Please find the progress leaps taken by the community during the year in discussion in this report.

We look forward to your critical appreciation!!

GARMA CROP : Under the summer crop production, farmers cultivate watermelon, muskmelon, cucumber, bottle gourd, ridge gourd and sponge gourd in an advanced method - Its main objective is to make farmers use an advanced method. Farmers in 24 villages in the block Tonto were distributed the watermelon seeds of the advanced species in 12.5 acres, muskmelon Seeds in 12.5 Acres, cucumber seeds in 20 Acres, bottle gourd seeds in 20 Acres, sponge gourd seeds in 20 Acres, ridge gourd seeds in 20 Acre and green gram seeds in 650 Acres. Along with this, the complete method of preparing nursery, Nursery care, water delivery method and pest control was taught. Using high quality manure and advanced farming techniques, the production was increased by 20 to 30%.

Garma Crop 2020						
Sl no	Block	Name of Crop/ Vegetable	Area Covered (Ha)	Average Productivity (MT/Ha)	Estimated Production (MT)	Estimated Value in Rs. (Based on MSP/Market Price)
1	Tonto	Green Gram	260	0.15	39	1950000
2	Tonto	Watermelons	5	3.45	17.25	345000
3	Tonto	Muskmelons	5	2.3	11.5	230000
4	Tonto	Bittergourd	8	2.8	22.4	448000

7	Tonto	Spongegourd	8	2.25	18	360000
8	Tonto	Cocumber	8	2.9	23.2	232000
Total			310	19.28	174.79	4177800

Distribution of yam seeds to landless families under summer crop - Under this activity, yam crop seeds were distributed to 1250 families in the landless family. The technical information of yam cultivation was also taught to the farmers, in which the treatment of seeds, All the information about the method of applying yam and how to take care of it was also provided. Under this 2.5 kg of seeds were distributed per family and the average production per family was 20-25 kg.

Integrated Natural Resource Management: - Under this activity, with the aim of increasing the income of farmers and increasing the area of irrigation, irrigation wells and shallow wells were constructed in the fields of poor beneficiaries. Irrigation wells in the fields of 20 beneficiaries and shallow irrigation wells/chuva in the fields of 27 beneficiaries were dug. Due to the facility of irrigation wells in the fields, 235 families and 47 farmers have a total of 265 acres of irrigated land now. Income and production have doubled since.

Papaya Cluster: - The main objective of this activity is to encourage the farmers to cultivate horticulture crops. Under this, papaya cultivation has been assigned to 3 farmers in 3 acres area in village Padmapur so that the income of the farmers can be doubled. Under the fencing of farmers, 3000 plants of papaya, chemical fertilizers, organic fertilizer, mustard cake, bone mill, the support of the organization was given by the organization, with the aim of increasing the income of the youth club. The work of nursery production of papaya was done by Sarna Jhumur Youth Club. With this, the youth club's income of Rs. 60,000 was

earned.

Convergence with ATMA : distribution of Irrigation Pumps, Irrigation Pipes, Sprayer Pumps was done to 140 farmers of Tonto Block, in which the contribution amount per farmer was Rs.3284. Due to this activity, the farmers have now got the facility of irrigation, due to which the farmers are now doing summer farming. The income of the farmers has doubled now. Besides, seeds were also supported by ATMA to large number of farmers during this year as well.

Agriculture in Kharif Season

Under Kharif crop production, farmers cultivate paddy, maize, tur, urad, sarguja in advanced method - Its main objective is to make farmers cultivate crops using an advanced method of farming, in which 3181 acres of agriculture land covering 26 villages in Tonto block, farmers have been given paddy for 2051 acres,

maize for 150 acres, pigeon pea for 495 acres, black gram for 435 acres and Sarguja for 50 acres, in which seed treatment, integrated plant management, kit management were adopted by the farmers for greater production and high yield. An increase of 20% was seen when the farmers used the advanced methods of farming during this season.

Distribution of chemical fertilizers, DAP, potash, urea, and organic fertilizers to farmers under Kharif crop production - Under Integrated Nutrient Management,

chemical fertilizers DAP, Potash and Urea was distributed to farmers in 3181 acres of area under Tonto block during Kharif crop season. The distribution of organic manure yielded 20 percent more production than the traditional method.

Crop harvesting and production estimation of Kharif crop - Under Kharif crop production, harvesting of paddy, maize, urad, sarguja, tur crop was done in Tonto block and production was estimated.

Kharif Crop – 2020 Production Report and Income Generation

Sl no	Block	Name of Crop	Area Covered (Acre)	Average Productivity (MT/Ha)	Estimated Production (MT)	Estimated Value in Rs. (Based on MSP/Market Price)
1	Tonto	Paddy Don 1	850	3.5	1190	16660000

Distribution of yam seeds to landless families under Rabi crop production-

Under this activity, yam seeds were distributed to 2500 landless families, along with the technical information required for yam cultivation. They were taught about seed treatment and all the information about the method of applying yam and how to take care of it was also provided. 2.5 kg of seed was distributed per family.

Under Rabi crop, farmers are given improved method of cultivation of gram, khesari, linseed, wheat, mustard, and lentils:

- Its main objective is to make farmers cultivate with advanced method. In 2250 acres in 26 villages in block Tonto, farmers are trained using advanced farming method. 400 acres of wheat, 300 acres of gram, 400 acres of khesari, 600 acres of lentils, 400 acres of mustard, 150 acres of linseeds were cultivated, in which seed treatment, integrated plant management, kit management were done for more production by the farmers. The advanced method adoption yielded 15 percent more production than the traditional method.

Crop harvesting and production estimation of Rabi crop - Under Rabi crop production, gram, Khesari, linseed, wheat, mustard and lentil crops were harvested in Tonto block and production was estimated.

Rabi Crop – 2020 Production Report and Income Generation

Sl no	Block	Name of Crop	Area Covered (Acre)	Average Productivity (MT/Ha)	Estimated Production (MT)	Estimated Value in Rs. (Based on MSP/Market Price)
1	Tonto	Wheat	400	1.11	177.6	3196800
2	Tonto	Gram	300	1.2	144	5760000
3	Tonto	Khesari	400	0.8	128	5120000
4	Tonto	Lentil	600	0.81	194.4	7776000
5	Tonto	Mustard	400	0.8	128	6400000
6	Tonto	Tisi	150	0.83	49.8	2241000
Total			3181			30493800

Under late rabi crop, farmers get watermelon, cucumber, gourd seeds with improved method of cultivation: - Under this, farmers get 9.65 acres of melon of advanced species, 12 acres of cucumber, 50 acres of bottle gourd

and 44 and 44.5 acres of other gourds seeds. For the first time, farmers cultivated by planting nursery ready plants, in which a community-based vegetable nursery was prepared in each panchayat and the farmers were given complete method of preparing nursery like seed treatment pro tray. They were taught how to prepare nursery, care for nursery, method of watering, kit control, use of manure etc.

Dishom Guru Poshan Vatika:-

The main objective of this activity was to provide balanced food to pregnant women and malnourished children of up to 0-5 years. These nutrition gardens were constructed in the house itself, so that 7 types of food could be consumed in 7 days. Fresh vegetables can be obtained in their own garden. Under this, in the rabi season in Tonto block, 50 Dishom Guru Nutrition Vatikas have been constructed and 350 nutrition gardens were raised during summer season in as many households. Vegetables rich in Vitamin A such

as spinach, spinach, Tomato, amaranth greens, coriander, brinjal, radish, red greens

have been selected for nutrition garden. Vegetables have been harvested 5-6 times per family. Nutrition garden is proving to be a worthwhile initiative towards healthy development of families.

Papaya Cluster :-

The main objective of this activity is to encourage the farmers to cultivate horticulture crops. Under this, papaya cultivation has been done by 3 farmers in 3 acres area in

village Padampur so that the income of the farmers can be doubled. Through the activity, an income of Rs 120000 has been earned by selling 40 quintals of papaya, in which the work of nursery production of papaya was done by Sarna Jhumur Youth Club, from which the youth club earned an income of Rs. 60000.

Income generating Poultry rearing activity :-

Under this activity, 100 female families of village Sundi Surnia have been selected for poultry farming, in which 100 chicken chicks, chicken feed, drinker feeder have been distributed, along with technical information of poultry farming. Training has been given to all the families. At the village level, 02 Pashu Sakhi is serving 50 -50 women families, and has earned an average income of up to Rs.12000 per female family.

Goat rearing activity: - Under this activity, 100 female families of village Bandijeri have been selected for goat rearing, in which 400 female goats and 20 male goats have been distributed to 100 female families for breeding along with technical training of goat rearing. 02 Pashu Sakhi are providing their service here to 50-50 female families at the village level. Per female family has made an average income of up to Rs.9000. At present there have been 196 goat kids.

Income Producing Facilitated Pig cluster :-

Under this activity, 100 female families of village Barakuchia have been selected for rearing, in which 4 female pigs and 2 male pigs have been distributed per family for breeding, along with facilitation rearing. Technical training has been given to all the families. At the village level, 01 Pashu Sakhi is providing its service to 100 women families, in which work like vaccination, first

aid, castration, giving anthelmintic medicine, etc. is being done. An average income of up to Rs.8500 has been generated from pig rearing.

Distribution of free mustard and gram seeds to farmers under convergence with ATMA west singhbhum :-

Under this activity, gram and mustard seeds were distributed to a total of 120 farmers of Tonto block, wherein 5 kg of gram and 2 kg of mustard seeds were distributed to each farmer. Besides seed distribution, training was also given to the farmers on various topics.

Under Convergence with ATMA west singhbhum, a 5-day field excursion cum training was organized for the farmers in Birsa Agricultural University:-

Under this, a total of 15 farmers of Tonto block were selected for 5 days of high value crop production technology training at Birsa Agricultural University Ranchi under the Atma project. The field excursion cum training was organized in which the capacity of the farmers was increased using the new technology of agriculture. After getting trained, farmers could

increase their production by using new technology in their particular area.

Progress of Youth Club: -

With the aim of providing employment to unemployed youth and teenage girls, 21 youth clubs have been formed under Tonto block out of which 18 youth clubs have been registered with Nehru Yuva Kendra. A total of Rs. 13,63,440 has been saved by the youth club. 2 youth clubs are doing business of pulse mills, one youth club is operating hauler machine and 17 youth clubs are doing fish farming, grocery shop, papaya nursery construction, tamarind business, tailoring and Tent House business.

कोरोना महामारी के दौर में जेटीडीएस बना किसानों का विकल्प

चाईबासा (आजाद सिपाही)। कोरोना महामारी के दौर में झारखण्ड ट्राइबल डेवलपमेंट सोसाइटी किसानों का विकल्प बन किसानों को

आर्थिक लाभ पहुंचा रहा है। इस महामारी के दौर में जेटीडीएस योजनाओं को लागू कर सुदूरवर्ती गांवों के किसानों को अपनी गतिविधियों से जोड़कर आर्थिक व सामाजिक लाभ पहुंचा रहा है। ज्ञात हो झारखंड के 14 जिलों में जेटीडीएस का कार्यक्रम चलाया जा रहा है। इसी प्रकार पश्चिम सिंहभूम के चार प्रखंडों में चलाया जा रहा है, जिसमें कि टोन्टो, सोनुआ, गोइलकेरा एवं खूंटपानी के प्रखंड में ये योजनाएं चल रही हैं। ये चारों प्रखंड नक्सल प्रभावित होने के बावजूद यहां के किसान इन गतिविधियों से जुड़ कर आर्थिक मदद पाकर अपने परिवार का भरण पोषण कर रहे हैं। जेटीडीएस द्वारा इस बार किसानों को गन्नी के फसल के रूप में तरबूज, खीरा, नेनुआ, झींगा, लीकी, लगभग 6000 किसानों को बीज दिया गया एवं 650 एकड़ में ये बीज लगाये गये थे। जिसमें कि टोन्टो प्रखंड में 1625 किसानों एवं 162 एकड़ के लिए बीज दिया गया। जिससे किसानों ने अच्छी आमदनी प्राप्त कर कोरोना की घड़ी में जेटीडीएस की योजनाओं को हितकारी बताया। वहीं इस संबंध में सहयोगी संस्था गैरर ने कहा कि ये बीज फरवरी में किसानों को वितरण कर दिया गये थे, जिससे कि लोकडाउन होते होते किसानों की फसल बेचने योग्य हो जाने के कारण कोरोना में किसानों को आर्थिक सहायता मिल पायी।

मनरेगा एवं JTELP परियोजना में समन्वय हेतु प्रखंड स्तरीय बैठक का आयोजन

मु० की शान, संवाददाता चाईबासा से अशोक पोद्दार कि रिपोर्ट :- पश्चिमी सिंहभूम के टोन्टो प्रखंड में गुरुवार को प्रखंड विकास पदाधिकारी (जनसमिति एका) कि अध्यक्षता में प्रखंड परियोजना संयोजन समिति कि बैठक कि गई, जिसमें प्रखंड में जितने योजनाएं चल रही हैं ग्रामीणों तक लाभ कैसे पहुंचे बीडीओ जनसमिति एका के द्वारा कल जानकारी एवं दिशा निर्देश दिए गए इस बैठक में टोन्टो प्रखंड के अंदर चल रहे झारखण्ड आदिवासी समािकरण एवं आजीविका परियोजना भी शामिल हुए इस बैठक में प्रखंड कार्यक्रम पदाधिकारी सुजात सिंक् एवं ग्राम सेवक, योजना सेवक कनीय

अभिरंता, सहायक अभिरंता शामिल थे, वहीं इस चर्चा में विचार किया गया कि कैसे JTELP परियोजना मनरेगा में समन्वय बनाकर कैसे कार्य की जमीनी स्तर पर लागूकों तक लाभ पहुंचा जाये इस पर विचार कर बीडीओ द्वारा दिशा निर्देश दिए गए, वहीं खखण्ड परियोजना के सहयोगी संस्था गैरर के सभी कर्मचारी भी उपस्थित रहे इस बैठक में संस्था के परियोजना समन्वयक श्री विनय सारस्वती कृषि विशेषज्ञ सरमाज दिखन कनीय अभिरंता मो. सहाय एवं समुदायिक प्रेरक अशरी पात्रो खेदर सोरन, जैनेंद्र देव्यम, नन्दलाल सुबिन, दोबरी सुंटी, दुर्गम मुहूर्तवा मनीष समद आदि उपस्थित थे।

झारखण्ड ट्राइबल डेवलपमेंट सोसाइटी बना गरीबों का सहारा

मु० की शान, संवाददाता पश्चिम सिंहभूम से अशोक पोद्दार जी हॉ झारखण्ड ट्राइबल डेवलपमेंट सोसाइटी एक ऐसी सोसाइटी जो आदिवासी बहुल क्षेत्रों में काफी अच्छा काम कर रहा है जिससे कि आदिवासी समुदाय के विकास में काफी मददगार साबित हो रहा है ये परियोजना झारखण्ड के 14 जिलों में चल रहा है

एवं 14 जिलों के विभिन्न प्रखंडों में चल रहा है इसी प्रकार पश्चिम सिंहभूम के चार प्रखंडों में चल रहा है जिसमें कि टोन्टो, गोइलकेरा, सोनुआ, खूंटपानी इत्यादि ये सभी प्रखंड नक्सल प्रभावित होने के बावजूद गाँव के हित में योजनाओं को जेटीडीएस द्वारा लागू कर विकास कि रफ्तार को अच्छी गति दे रहे है ये सभी प्रखंड में विभिन्न प्रकार के योजनाओं के माध्यम से

आजीविका को बढ़ावा दिया जा रहा है जैसे कि वैज्ञानिक पद्धति से कृषि एवं बीज खाद का निशुल्क वितरण युवा समूह के ग्रामीणों को व्यापार संबंधी प्रशिक्षण पशुपालन निशुल्क पशु एवं निशुल्क प्रशिक्षण

दिशोम गुरु पोषण वाटिका सिचाई हेतु निशुल्क कुआँ चुआँ तालाब सिचाई उपकरण एवं कृषि उपकरण आदि देकर ग्रामीणों को आगे बढ़ाया जा रहा है एवं इस परियोजना से ग्रामीण भी काफी खुश है।
